PROFESSIONAL SUMMARY

Fullstack Java Developer with hands-on experience building web applications using Java Spring Boot, Next.js, and TypeScript. Familiar with RESTful APIs, responsive frontend development, authentication workflows, and real-time features. Experienced with Redis caching, Kafka-based asynchronous processing, Dockerized deployment, and AWS cloud environments. Seeking to contribute to scalable fullstack systems while growing expertise in modern software engineering.

TECHNICAL SKILLS

Frontend Development: Next.js, React.js, TypeScript, JavaScript, TailwindCSS, Responsive Design

Backend Development: Java, Spring Boot, RESTful APIs, JWT Authentication, OAuth2, WebSocket, gRPC

Databases & Messaging: PostgreSQL, MySQL, MongoDB, Redis, Apache Kafka

Cloud & DevOps: Docker, Postman, AWS EC2/RDS/S3, Git

PROFESSIONAL EXPERIENCE

Fullstack Developer - QUANG KIM DIGITAL TECHNOLOGY INVESTMENT AND DEVELOPMENT CO., LTD

Feb 2026 - May 2026

- Engineered and delivered end-to-end business modules using **Java Spring Boot** and **Next.js** within an **Agile/Scrum** environment, accelerating feature release cycles by 15%.
- Architected and optimized secure **RESTful APIs** and DTO configurations, ensuring seamless frontend-backend data synchronization and reducing payload sizes.
- Optimized **PostgreSQL/MySQL** database layers by refactoring complex queries and implementing efficient connection strategies, improving backend data retrieval latency.

IT Engineer - UNICCS Vietnam

Dec 2025 - Feb 2026

- Developed robust backend business logic and secure API endpoints to streamline complex enterprise workflows, reducing system processing bottlenecks.
- Monitored and maintained application infrastructure on **AWS EC2 and RDS**, actively troubleshooting production issues and optimizing SQL queries to ensure 99.9% system uptime.

Freelance Fullstack Developer

Mar 2025 - Sep 2025

- Built and deployed scalable multi-tenant web applications handling 1,000+ daily requests, leveraging **AI-assisted** tools (Cursor/Copilot) to boost development velocity by 30%.
- Designed reusable UI components in **Next.js** (App Router) and TypeScript with **TailwindCSS**, ensuring 100% responsive layouts and fluid user experiences.

KEY PROJECTS

E-commerce Platform (Java, Spring Boot, Next.js, PostgreSQL, Kafka, Redis)

Built a fullstack e-commerce platform supporting product management, authentication workflows, ordering systems, and responsive customer-facing interfaces using Spring Boot and Next.js.

- Architected an asynchronous ordering and payment system using **Apache Kafka**, decoupling microservices and successfully enduring peak traffic simulation.

- Boosted API response latency by 40% and cut redundant DB hits by 65% through strategic Redis caching layers and **PostgreSQL B-Tree indexing**.
- Crafted reactive user interfaces using **React Server Components** in Next.js, integrating **WebSocket** for instant review synchronization and debounced search hooks to optimize client network traffic.

E-learning Platform (Java, Spring Boot, Next.js, PostgreSQL, MongoDB, Kafka, WebSocket, Cloudflare R2)

Developed a scalable fullstack learning platform supporting real-time communication, file management, and multi-role learning workflows.

- Implemented a Hybrid Persistence Strategy utilizing **PostgreSQL** for relational ACID transactions (enrollments, billing) and **MongoDB** for flexible, un-structured course content schemas.
- Engineered multi-role RBAC authorization secured via **JWT & OAuth2**, protecting restricted workflows across Administrator, Lecturer, and Student profiles.
- Integrated **Cloudflare R2 / S3 Object Storage** for stateless, concurrent media uploads, paired with Kafka + WebSocket to broadcast real-time grading alerts instantly.

EDUCATION

Ton Duc Thang University (Bachelor Degree)
Information Technology

Sep 2022 - June 2026
 (Expected)
GPA: 8.1/10
